KDC[®]185

Wearable Mini Bluetooth Barcode Scanner & Data Collector

Rugged ▶ Powered ▶ Designed ▶ Connected ▶ Equipped ▶

The ultra-compact and lightweight KDC185 barcode scanner puts the power of a KDC at your finger tip. Designed to be worn on a single finger, the KDC185 is slender and discreet. Combine the KDC185 with either a KOAMTAC Ring Trigger or Safety Glove to take your scanning on the go. When it's time to charge, simply charge via Type-C USB cable or pogo pins in our 2 or 10-Slot Charging Cradles.

Rugged

The KDC185 is IP65-rated and has a 6' drop spec when equipped with a protective rubber boot. This rating means that the KDC185 is dust tight and water resistant; ideal for any environment.

Powered

Advanced power management puts the KDC in "hibernation mode" when not actively in use, allowing the user to achieve maximum battery life. Charging is made easy with Type-C USB cable or charging cradle options. Additionally, the KDC185 is equipped with a removable 500mAh lithium-polymer battery, enabling the user to make quick battery swaps.

Designed

The KDC185 effortlessly integrates with the KDC185 Ring Trigger or Safety Glove and can be quickly switched between each wearable solution. Crafted with mobility and ergonomics in mind, the KDC185 is light and compact enough to be worn on a single finger without sacrificing performance. A 0.66" OLED display relays scanning feedback to the user along with two LED indicators.

Connected

The KDC185 features Bluetooth® Low Energy 5.0 to enable faster and simpler connection methods for use with smart watches, smart glasses, and other smart devices. The KDC185 also features NFC Pairing, which allows Android host devices to connect in HID or SPP by simply tapping the NFC area of the host device with the KDC185. Additionally, automatic setup is supported by Samsung KNOX.

Equipped

The KDC185 is equipped with a 2D imager scan engine capable of reading all major barcode symbologies. 5MB of on-board memory stores up to 262,000 UPS product barcodes and allows basic applications to run right on the device.

KTSync® software with keyboard wedging, application generation, database look up, inventory management, and KDC configuration features is included for Android, iOS, and Windows devices. Complementary SDK for Android, iOS, Mac OS X, Windows, Xamarin, and Cordova as well as technical support from top engineers and the development team ensure ease of data collection in any situation.
